

Sliding Glass Doors

Dressing Rooms

Procentium (8)

Great Hall North

Hydraulic Platform  
45' x 8'

Notes:

The only rigging in the Great Hall is directly over the stage as shown on this drawing. Beam clamps must be used to attach to the overstage steel. Many of the counterweight sets have house items on them that cannot be removed.

The Great Hall is equipped with a flown house sound and lighting system. The house systems are attached to a pipe system that runs between the soffits. The pipes are seated on top of the decorative plaster ceiling and cannot support any additional weight.

We strongly encourage use of the in-house systems.

Great Hall South

Loading Bridge  
Fly Rail

Overhead Door  
14'3"w x 12'h
